3	API handler	3

Chapter 1

Introduction

This is a starter chapter to help you get going with the template. Replace this content with your own writing. Below are examples of the custom commands available in this template.

1.1 Images

Use `\insertimage` to include a figure with a caption and label:

Figure 1.1: A sample placeholder image

As shown in Figure 1.1, images are automatically centered and numbered.

1.2 Tables

Use `\inserttable` to create tables:

Item	Value	Status
Alpha	42	OK
Beta	17	OK
Gamma	99	N/A

Table 1.1: A sample table

Refer to Table 1.1 using its label.

1.3 Code Snippets

Insert code from an external file:

```
code/sample.py
1 from fastapi import FastAPI
2 from functions import get_avatar_url, add_avatar_url
3
4 app = FastAPI()
5
6 @app.get("/avatar/random")
7 async def get_avatar():
8     url = await get_avatar_url()
9     return {"url": url}
10
11 @app.post("/avatar")
12 async def add_avatar():
13     await add_avatar_url()
```

Code Snippet 1: A sample Python script

Or show specific lines:

```
code/sample.py
6 @app.get("/avatar/random")
7 async def get_avatar():
8     url = await get_avatar_url()
9     return {"url": url}
```

Code Snippet 2: function `get_avatar`

```
11 @app.post("/avatar")
12 async def add_avatar():
13     await add_avatar_url()
```

Code Snippet 3: API handler

1.4 Callout Boxes

Note

This is an informational note. Use it to highlight important details.

Warning

This is a warning box. Use it for caveats and potential pitfalls.

Tip

This is a tip box. Use it for best practices and helpful hints.

1.5 Abbreviations

First mention of API¹ will include a footnote with the full form. Subsequent uses of API will just show the short form.

You can also use:

- `\abbrfull{api}`: Application Programming Interface (API)
- `\abbrshort{api}`: API
- `\abbrlong{api}`: Application Programming Interface

1.6 References

Cite sources with `\insertref{key}`, e.g. [1] and [2].
